

# Mock-Up

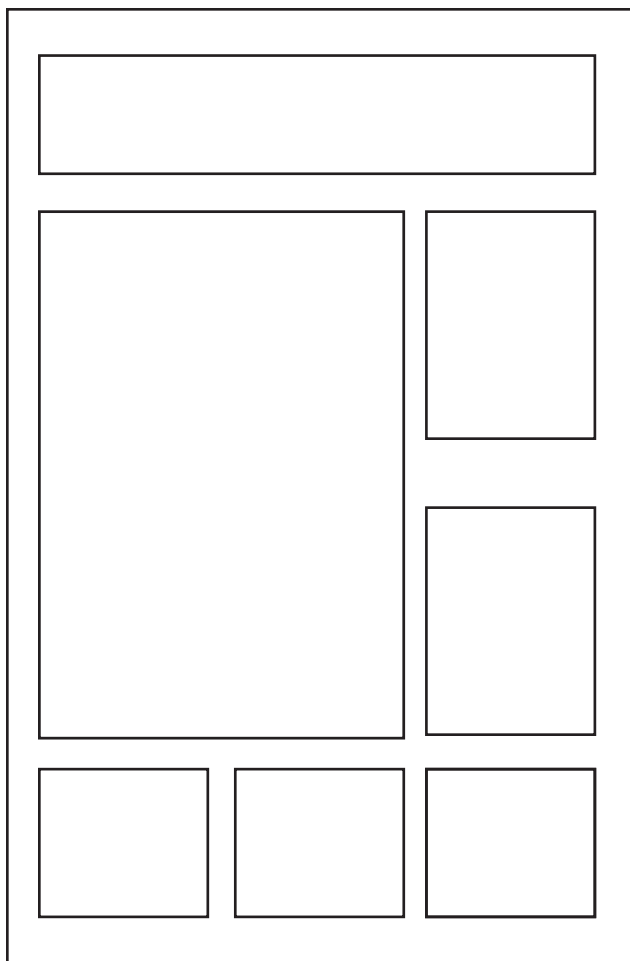

For this assignment you will use modular design and CRAP to create a layout. This layout is simply a mock-up, or holder pictures and text, to represent what could turn into a sweet design later on for newspaper/yearbook.

1. Using rectangular shapes, sketch a layout.
2. Get your layout approved by me.
3. On a separate piece of paper, cut out magazine the same shape and sizes of your sketch to create the layout.

(Do not focus on colors/content of photos and if a headline is cut short of making sense but fits your space in the layout. This is a pretend version of what could be.

Example:

Sketch

Mock-up
